DETAILED ACTION

Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 1-13 and 20, drawn to a method of contouring a surface of a slider, classified in class 29, subclass 603.07.
 - II. Claims 14-17, drawn to a lithographic mask, classified in class 430, subclass 5.
 - III. Claims 18 and 19, drawn to a slider, classified in class 360, subclass 235.6.
2. First, Inventions I and II are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed in Group II can be made by another and materially different process, such as one that does not require “applying a lithographic resist layer”, “etching the slider surface”, etc., as required by Group I.

Second, Inventions I and III are related as process of making and product made. The inventions are distinct if either or both of the following can be shown: (1) that the process as claimed can be used to make other and materially different product or (2) that the product as claimed can be made by another and materially different process (MPEP § 806.05(f)). In the instant case the product as claimed in Group III can be made by another and materially different

process, such as one that does not require “applying a lithographic resist layer”, “etching the slider surface”, etc., as required by Group I.

Last, Inventions II and III are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention II has separate utility such as a lithographic mask in which a diffraction grating and attenuated phase shifters are incorporated into the same mask. See MPEP § 806.05(d).

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

3. An telephone call was made to, David Brush, (612) 334-3222, on Tuesday, 3/9/2004, to request an oral election to the above restriction requirement, but did not result in an election being selected.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).
